Summary

Front-end developer specializing in JavaScript ES6 with experience working in diverse and collaborative environments. Key projects include developing secure authentication systems with React and creating dynamic data visualizations with D3, integrating AWS data via RESTful APIs for enhanced functionality. Committed to expanding design capabilities and collaborating with cross-functional engineering teams.

Skills

- **Front-End:** HTML5, CSS3/SASS, JavaScript, React, Next.js, WordPress, Bootstrap, JQuery,
 - **Back-End:** Node.js, RESTful APIs
 - **Tools:** GitHub, Terminal
 - **Workflow:** Agile/Scrum, Sprints, Team Development
 - **Soft Skills:** Communication, Strategic Planning, Collaboration
-

Work Experience

AnnieCannons — *Front-End Developer* — Apr 2022 - Present *Oakland, CA*

- Integrated AWS data via RESTful APIs into a React.js application, enhancing accessibility and expanding application functionality using AWS SDK and React hooks.
- Developed interactive data visualizations using React and D3, contributing to the thorough analysis of collected data.
- Implemented secure login and authentication utilizing React and JavaScript, and reinforced application security best practices.

Wonder Women Tech — *Web Developer* — Jun 2022 - Sep 2022 *Long Beach, CA*

- Designed and maintained the WWT Virtual Summit 2022 page using HTML, CSS, WordPress, and WP Bakery, improving user interface design.
-
